

Immortan Joe – Painted Mask

Thank you for ordering one of our painted Immortan Joe masks! Please read below for detailed information about the mask, and how to get it ready to wear. If you have any questions, please don't hesitate to contact us at HauntedKnoll.etsy@gmail.com, or via the Etsy convo system.

Included with this shipment

- Fully painted Immortan Joe mask
- 2 x Gas mask hoses

About the mask

- The mask is cast with a semi-rigid plastic resin (Smooth-Cast 65D), but it is NOT unbreakable. It isn't *fragile*, but it should be treated with reasonable care.
- It has been primed with Rust-Oleum Automotive Self-Etching Primer
- Color is applied in several steps, using acrylic paints
- The leather strap been dyed, and professionally burnished
- Minimal padding has been added to the mask

Preparing to Wear

The attached leather straps are adjustable, and should fit most people, as-is. Feel free to punch more holes, as necessary.

If any alterations to the mask itself are desired, they should be done with a Dremel tool, or similar. Be sure to wear eye protection, and a respirator!

If you wish to add more padding, it is recommended to attach to the inside of the mask, using hot glue.

The hoses fit in the holes on either side of the mouth, using the rubber end without the threaded coupler. The threaded ends can be cut off, or attached to another part of your cosplay.

The ends of the hoses are slightly too long, so you may want to trim them, for wearing comfort; just be sure not to cut them *too* short. They can be secured to the mask in various ways. We've had best luck with either hot glue on the inside, or by running a nail, or something similar, through the end of the hoses, to prevent them from pulling back out of the mask.

Thanks again, and send us an "Action Shot" of the mask; we'd love to see it!
