

Psycho Bandit – Painted Mask

Thank you for ordering one of our painted Psycho Bandit masks! Please read below for detailed information about the mask, and how to get it ready to wear. If you have any questions, please don't hesitate to contact us at HauntedKnoll.etsy@gmail.com, or via the Etsy convo system.

Included with this shipment

- Fully painted, and assembled Psycho mask
- 1 x CR2032 battery

About the mask

- The mask is cast with a semi-rigid plastic resin (Smooth-Cast 65D), but it is NOT unbreakable. It isn't *fragile*, but it should be treated with reasonable care.
- It has been primed with Rust-Oleum Automotive Self-Etching Primer
- Color is applied in several steps, using acrylic paints
- The leather strap junction has been dyed, painted, and professionally burnished
- Padding has been added to the mask, and minimally trimmed

Preparing to Wear

The attached elastic straps are almost certainly too long. Adjust them as necessary, and trim the excess, if you wish. Be careful not to go too short though, so there is still a bit left and won't accidentally pull loose. After cutting with scissors, it is a good idea to singe the cut edge with a match/lighter, just to help prevent fraying (don't light it on fire though!).

The included battery must be inserted + side up, as seen below. A single battery should last about 8 hours of constant use, before beginning to fade. CR2032 batteries are fairly expensive retail, so contact us if you'd like to purchase more; we get them at a significant discount.

If you need to trim the padding more, it is best to do so with an extremely sharp knife, e.g. X-Acto. If you require MORE padding, please let us know, and we'll be happy to send you some.

Thanks again, and send us an "Action Shot" of the mask; we'd love to see it!
